Detail information of field supervision

Date	10.12.24 & 11.12.24
Place(s) of visit	Monywa <ul style="list-style-type: none"> - SDP - Volunteers - Home based monitoring to TB patients
Coordination activities	NTP <ul style="list-style-type: none"> - I had advocacy to NTP TB focal for the UNION TB suspected patient referral for TB consultation and TB screening. Currently, there is no challenges in NTP with the UNION coordination and they also welcome for our referral channel PICTS. Lab public <ul style="list-style-type: none"> - Lab technician is also well coordinated and there is also done for sputum examination including normal screening and Gene xpert (6 color and 10 color). - There is no current challenges in lab public and lab technician about sputum examination and sputum results issue.

Program activities

SDP site

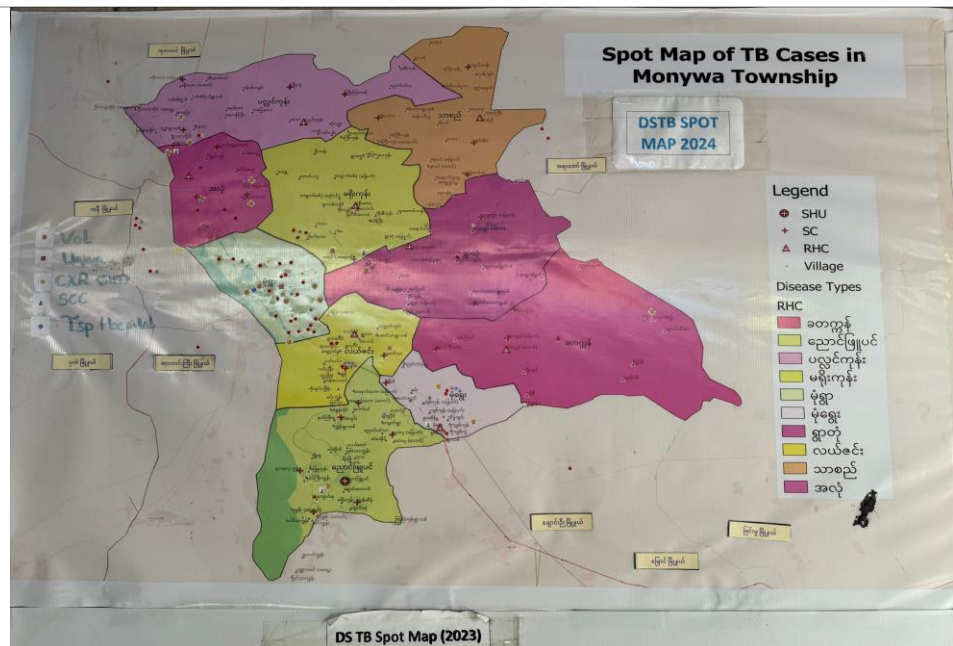

- I had monitoring to SDP as follows,
 - (1) Review for Q3 2024 achievement data in SDP including Registers (Presumptive, Notified, TPT, DOTs, TB-HIV, TB- DM, TB- Tobacco)
- Q3 achievement data in Monywa is follows,

There is also discussed with FO for Monywa achievement data and review for TB patients and TPT patients in case recordings at the registers. FO is well oriented in data recording & reporting in register and no challenges for him. We had also discussed for data reporting and some data unmatched in the registers of Q3 2024.

(2) Township mapping

It is updated up to September 24 in TB cases and updated up to July 24 in Volunteer information.

(3) SDP office Furnitures

Monywa SDP has no current issue in furnitures at SDP including Electric Machine, Batteries and refrigerator etc.

FO request for 2 foldable tables for volunteer meeting and 1 shelf with 3 level for IEC/promo storage in SDP.

(4) Documentation

There is MEAL data is stored at SDP from 2019 to current 2024. Program data is also stored in this timeline period.

Volunteer supervision

- I had visited to volunteer **Daw Win Myaing** at Nan Da Won Village and she is active volunteer by covering Za lote, Kine Taw, Kan Ma, Ywar Tone, Nyaung Taw Htone, Nyaung Pin, Set Hmu 1 & 2 , Nan da Won, Pyi taw Tar and Mya Wa Ti village sites.

She had currently cases finding **149 TB suspected cases** and **28 TB cases** evaluated among them. These TB cases are also provided DOTs supervision by her. She is using Vol app and Dots app but she is only adapted with Vol app and Dots app is not suitable for her to use due to internet line connection.

Then, she is well supported by IEC/promo such as surgical masks, Back Bag, Gloves and pamphlets. There is requested for **other new promo items** such as umbrella, hat and good quality ball pen.

Currently, she has performed door to door HE sessions but group HE session is not convenient to organize now due to current political situations in Monywa with increased checked points and unstable security condition.

Home based monitoring to TB patients

I had monitoring visit to TB patients by assessing their adherence, drug side effects, drug timings and volunteer supervision frequency to TB patients. Currently, volunteers practice with 2 times per week (1 time in person and 1 time by phone) at Intensive phase and then 2 times per month (1 time in person and 1 time by phone) at continuous phase.

Daw Htay Nwe who is 64 years old woman diagnosed with pulmonary TB (Sputum negative & CXR detected) and started IR regime at 20.9.24, TB ID – MYW 24/077, DOTs started date is 25.9.24. She has regular TB drug taken and not serious side effects.

U Htay Win, 59 yr with pulmonary TB (Sputum negative & CXR detected) and started IR regime at 28.11.24, TB ID- MYW 24/092, DOTs started date is 28.11.24. He is also regular drug taking and no serious side effects. They are married person living at the same house. There is also done contact tracing to their household members and no TB suspected in them.

Daw Tin Mar Lin who is 62 years old women, a poor living alone at the housing. She has no other family members and only depends on daily income by doing domestic work at nearby homes. She was done TB screening at contacting our volunteer and diagnosed as pulmonary TB. She had treated with IR regime started at 21.9.24, TB ID – MYW 24/078, DOTs started at 25.9.24. Good adherence and no side effects. Follow up sputum become negative.

Ma Su, 25yr living at Nyaung Yate Thar ward, diagnosed with pulmonary TB (sputum negative & CXR detected) that is treated with IR regime started at 21.11.24, TB ID – MYW 24/0903, DOTs started at 21.11.24. She is good adherence and no special side effects. She has husband & under 5 baby that are also screened for TB but not TB detected in them.

I had also monitoring visit to other TB patients as,

- (1) Su Htet Htet Hlaing, 2yr & 6 mth old female, living at Pyi Taw Thar ward, CR regime started at 12.10.24 and DOTs started at 14.10.24, TB ID- MYW 24/084, no side effects and good adherence.
- (2) U Thein Hlaing, 78 yr, living in Aye Cho ward, diagnosed with pulmonary TB with sputum positive, IR started at 17.9.24 and DOTs started at 17.9.24, TB ID- MYW 24/074, no side effects and good adherence, follow up sputum become negative at 7.11.24.

Township Conclusion

Monywa township is currently security condition is unstable and increased checked points in downtown. There is also community unsafe due to thefts and conflicts in some remote areas. Therefore, we had concerned about the volunteer safety and referral patients in Monywa. However, volunteers are active and well experienced who also medical consultation person to their nearby villages. So, they also have screened TB suspected cases among their community patients to our PICTs program.

Then, Monywa is current fuel charges is higher and limited resources in Fuel shop by making Q until December 2024. Therefore, we will need to consider for adjustment of TA scheme for Monywa township for some TA support ways.

Monywa is also one of the increased active volunteers and TB community referral. TB patient supports are also given to hospitalized and investigations such as Ultrasound, CT scan, Blood tests for TB screening & TB drug side effects. Incoming 2025, we will need to adjust some TA in Monywa villages for update in township TA scheme.

Finding	Instruction for action taken
SDP <ul style="list-style-type: none"> - Need to update volunteer information and TB cases in township mapping - MEAL documents recording practice needs to maintain current practice. 	Responsible person by FO – Ko Yan Aung
Volunteer	PM – Dr Lynn Htet Aung

	<ul style="list-style-type: none"> - Will need to review volunteer IEC/promo items in new supply such hats, umbrella. 	
	<p>TB patients</p> <ul style="list-style-type: none"> - Need to regular monitoring visit to TB patients by phone or in person for accessing drug adherence & side effects. 	Volunteers
M&E activities	Q3 2024 checked at registers (Presumptive, Notified, TPT, DOTs, TB tobacco TB HIV, TB HIV)	

Recommendations

Recommendation	To follow up the findings and responsible person by assigned person in coming next quarter.
